# SYSTEM OVERVIEW

VAHLE's VKS 10 compact conductor bar is a specially designed member of the vCONDUCTOR product family for use in warehouse and logistics applications. It consists of a compact, insulated & accidental touch-safe housing with up to 10 integrated copper conductors. These conductors are protected according to European standard EN 60529, comply with accident and VDE regulations for electrical, mechanical and fire safety and are protected to IP 21 standards. Contact protection for the system collectors is only applicable if the carbon brushes are fully inserted into the housing. For systems in which the collectors leave the conductor bar during operation, additional protection against contact must be made at the installation site, e.g. physical barriers and/or shut off switches.

VKS 10's compact design allows for easy accommodations in all typical warehouse and material handling systems. Additionally, specialty VAHLE support profiles are available for increased installation flexibility. The conductor bar is designed for indoor use, may be installed in horizontal or vertical orientation, and for straight or curved system layouts.

## TECHNICAL DATA

### CHEMICAL RESISTANCE OF THE INSULATED HOUSING AT

#### +45 °C AMBIENT TEMPERATURE:

Petrol, mineral oil, greases.....resistant  
 Caustic soda up to 50 % .....resistant  
 Hydrochloric acid, concentrated .....resistant  
 Sulfuric acid up to 50% .....resistant  
 UV (Xenon test > 1500) .....resistant  
 Water absorption: .....20 °C = 0.06%  
 Ambient temperature: .....-30 °C to 55 °C  
 .....(Application area)  
 Max. temperature differences: .....50 °C(50 ≤ Δ T)<sup>(2)</sup>  
 from -10 °C to +40 °C with supply length = 6m  
 from -30 °C to +20 °C with supply length = 4m (deep freeze storage<sup>(2)</sup>)

### ELECTRICAL VALUES OF THE CONDUCTOR SYSTEM

Max. continuous current:.....140A<sup>(1)</sup>  
 Permitted operating voltage (UL): .....690V (600V)  
 Dielectric strength in accord. with DIN 53481:.....> 25 kV/mm  
 Specific resistance in acc. with IEC 60093:.....> 1x10<sup>14</sup> Ω x cm  
 Surface resistivity IEC 60093 .....2.1 x 10<sup>13</sup> Ω  
 Leakage resistance in acc. with IEC 60112:.....CTI > 400  
 Combustibility:.....flame retardant, self-extinguishing, UL 94 VO

**Please note:** When using extra-low voltages please submit detailed information with your inquiry, especially with regard to the ambient conditions. In order to process quotations and orders, we require drawings if the conductor system includes curves or rail section isolation.

Please use our questionnaire on page 26.

Conductor Material	Copper				Unit
Cross section	16	25	30	35	mm <sup>2</sup>
Impedance at 60Hz <sup>(3)</sup>	1.106	0.728	0.602	0.510	Ω/1000m
Resistance	1.102	0.723	0.595	0.510	Ω
Ampacity	60	100	120	140 <sup>(1)</sup>	A

(1) 80 % duty cycle

(3) By parallel circuit (doubling of cross section) the impedance and the resistance are halved

(2) Cold store applications on request

# SYSTEM DETAILS

## VKS 10 COMPACT CONDUCTOR SYSTEM

### SECTIONS

The insulated housing accommodates up to a maximum of 10 conductors and provides reliable insulation. The standard length is 6 meters, shorter lengths can be supplied. The ground conductor rail is identified with continuous yellow marking. The asymmetric design eliminates the possibility of reversing the phases during installation.

### JOINTS

The insulated housing sections are connected with joint caps, the conductors are joined with copper plug-in connectors.

### FEEDS

Feed units can be supplied as either end or line feeds. Line feeds are available with plastic terminal boxes or flat line feeds for direct single core cable connection. Both line feed types are supplied pre-assembled on a 1 m conductor rail section. Custom length line feed sections are available on request.

The end feeds are supplied loose and must be used in conjunction with the VLS line feed.

### HANGERS

The maximum distance between suspension points must not exceed 1.2 m. The hangers are available for the following mounting options:

1. For assembly in VAHLE support profile (self-locking)
2. For assembly in c-rail (bolted type)
3. For assembly to plain surface (bolted type)

The conductor system can move with the sliding hangers for longitudinal expansion. One fixpoint hanger is required for each conductor section. At the fixpoint it is locked by an additional screw. The distance between two fixpoints is max. 6 m.

### ISOLATING SECTIONS

Conductor dead sections are electrical interrupts of the conductor.

Under normal operating conditions a cross over with collectors to switch the voltage off or on is only allowed with low power ratings (control current).

Conductor dead sections can be mounted at any position of the system.

The plastic inserts are pushed into the copper profiles and ensure a smooth transfer of the collector brushes. The length of the isolating section has to consider the total length of the carbon brush and whether the carbon brush must or must not bridge the isolation area.

**Attention:** Special attention is required for double collectors or collectors switched in parallel. Use double isolating sections where necessary.

### CURRENT COLLECTORS

The current collectors are manufactured from impact resistant plastic and stainless steel parts. The current is transmitted by a carbon brush. According to the application, one or more current collectors are required per phase and ground conductor. The current collectors for the ground conductor can be identified by yellow color-coding and are equipped with different fixings to make them not-interchangeable with the phase current collectors. Springs in the current collectors ensure even pressure of the carbon brush against the conductor, thus maintaining reliable contact.

The current collectors must be mounted on base plates or rectangular brackets.

The length of the current collector cable should not exceed 3 m, if the connected overload protection is not according to the load of this connecting cable. See as well DIN VDE 0100, part 430 and DIN EN 60204-32.

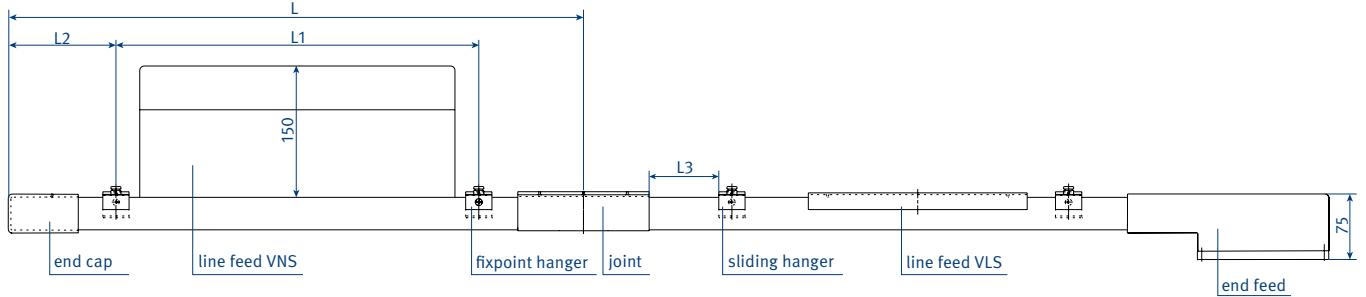

(**Note:** This often occurs in systems with more collectors per system.)

The connection cables provided are adequately sized for the specified nominal currents. Reduction factors in accordance with DIN VDE 0298-4 are to be taken into account for various layout methods.

### LAYOUT PLAN

Applications requiring curves, transfers, switches or isolations require a completed and approved layout plan prior to delivery.

# SYSTEM LAYOUT

L = length of conductor section (standard length: 1m, 2m, 3m, 4m, 5m, 6m respectively short length)

L1 = support distance for straight runs: max. 1.2m in curves: max. 0.6m

L2 = overhang (max. 350 mm)

L3 = distance, to be allowed for conductor system expansion (min. 50 mm)

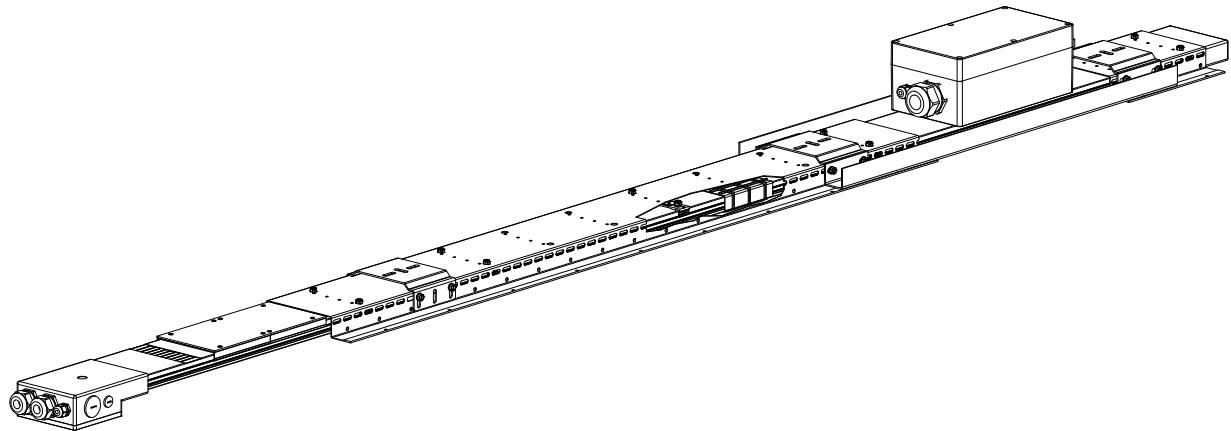

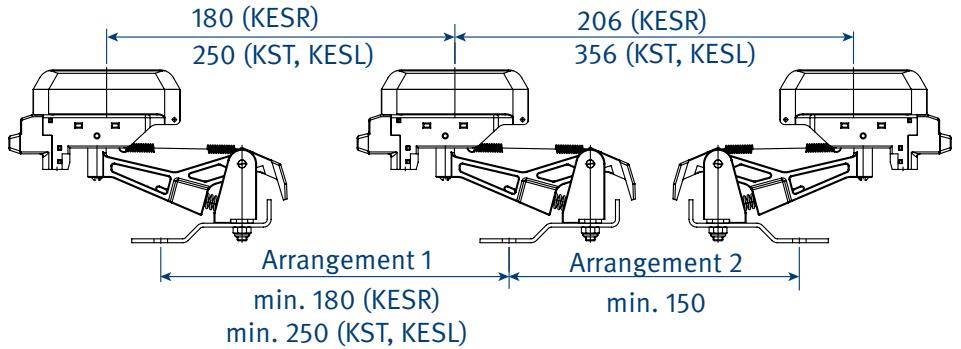

## MAX. HANGER DISTANCE

### CONDUCTOR SYSTEM VKS10

- In straight runs 1.2 m
- In curves 0.6 m
- Horizontal 0.6 m

### SUPPORT PROFILE VTP10

- On rack uprights 4.5 m
- On support posts 4.0 m
- Horizontal arrangement 3.0 m
- Attached to the wall 3.0 m

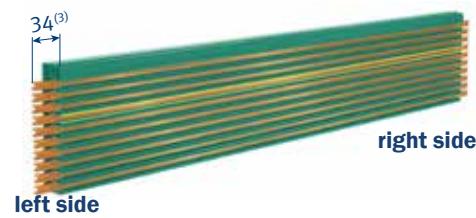

# STANDARD SECTIONS

Standard lengths: 6 m  
Cold stores: 4 m  
HS = with ground

**ATTENTION:** Joints to be ordered separately (see page 8).

Standard length is 6 meters, please change order no. suffix to 1, 2, 3, 4, 5 as required.

Example Order-No: 780 04**6**

# CURVED SECTIONS

## SPECIFICATIONS

Minimum copper cross section = 25mm<sup>2</sup>

Maximum curve length = 5.3 meters

Hanger distance = 0.6 meter

Maximum angle = 180°

Inside bend = conductors inside

Outside bend = conductors outside

Minimum horizontal radius (inside) =

1000mm<sup>(1)</sup>

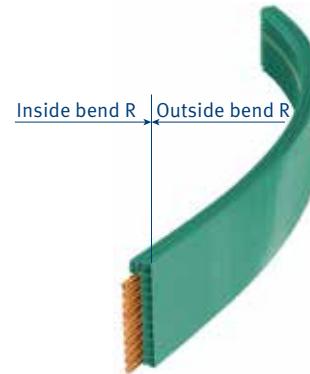

Minimum horizontal radius (outside) =

1500mm<sup>(1)</sup>

## TO ORDER

Identify desired VKS 10 type (pg. 6-7).

Supply desired type and system layout drawing to factory. Consult factory for parameters outside listed specs. Vertical curves possible. Consult factory for details. Bends are supplied with straight ends, each 250 mm long.

## JOINT KITS

Each kit supplied with joint material & joint cover.

See "No. of Poles" for quantity of joint material per kit.

One joint kit required per system joint.

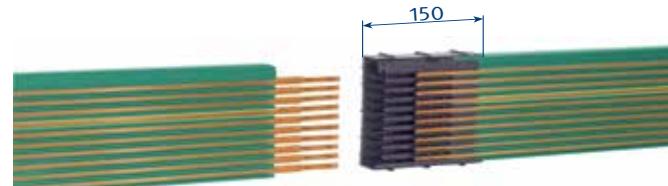

### JOINT MATERIAL

**Plug-in joint  
for 140-280 A**

**Plug-in joint  
for 60A and 100 - 120A**

## CONDUCTOR SECTION FOR EFTV FUNNEL

Must be ordered in conjunction with EFTV funnel. All cross sections 25 mm<sup>2</sup>, length 1365 mm

Type	Order-No.
VKS10-4/100-1365HS	781 442
VKS10-5/100-1365HS	780 743
VKS10-6/100-1365HS	780 247
VKS10-7/100-1365HS	780 248

Type	Order-No.
VKS10-8/100-1365HS	780 249
VKS10-9/100-1365HS	780 250
VKS10-9/100-1365HS	780 250
VKS10-10/100-1365HS02AT	780 257

(1) Transfer funnel only in combination with conductor section.

# TRANSFER FUNNELS & GUIDES

## TANGENTIAL ENTRY FUNNEL

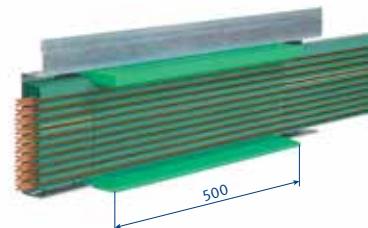

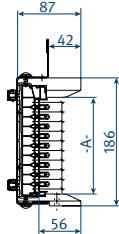

For collector KSTU 30-63

Max. entry speed  $v = 100 \text{ m/min.}$

Copper cross section min.  $25 \text{ mm}^2$

Tolerances:  $x = \pm 10 \text{ mm}$

$y = + 8 \text{ mm}, -7 \text{ mm}$

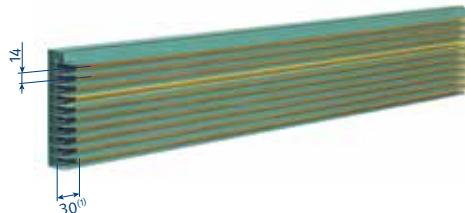

Type	Weight kg	Current (A)	No. of poles	Order-No.
DSEV10-4-KSTU30/63	1.888	56.5	4	781 453
DSEV10-5-KSTU30/63	1.884	70.5	5	781 452

VU10-10L	conductor 1-10	780 269
VU10-10R	conductor 1-10	780 270

(1) Length of the conductor dead section (longer dead sections on request)

# COMPACT CURRENT COLLECTORS

## COMPACT CURRENT COLLECTOR KESR 32-55

Reverse run

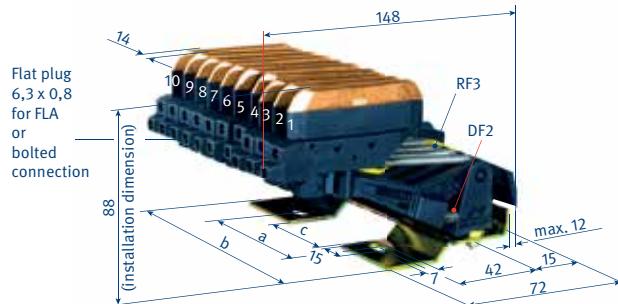

Distance between conductors: 14 mm

Lift and swivel  $\pm 15$  mm

Contact pressure: approx.: 7 N per carbon brush

PE (ground) on No. 4, (other combinations possible)

The ground collector always moves first when entering the conductor system.

Max. current	Flat plug	Bolted connection
32 A	FLA 2.5	AEA 2.5
40 A	FLA 4.0	AEA 4.0
55 A	FLA 6.0	AEA 6.0

(1) Bigger clamping range on request

(2) Locking torque of the round-head screw M 10, MA= 18 Nm

# POSITIONING SYSTEMS

## EARTHING OF THE CODE RAIL:

Ensure the WCS code rail is connected to a low Ohmic potential every 30m or less.

Type	Weight kg	Order-No.
WCS3-EVTP10	0.026	302 160

## FIXING CLIP

For laminate band

Fixing distance 0.2 m

Type	Weight kg	Order-No.
WCS3-BKK	0.002	780 193

## POSITIONING

Encoding band

Type	Weight kg	Description	Order-No.
WCS3-CS70-L2	0.040	Plastic laminate band with special perforation (WCS 3)	302 106
WCS3-FPK	0.001	Screws for fixation	780 140
BCB-50	0.015	Barcode band (BCB)	302 107

(1) Max. travel length 327 m  
 (2) Max. travel length 10,000 m

# INSTALLATION TOOLS

## JOINT CAP ASSEMBLY TOOL

For use with support profile

Type	Weight kg	Order-No.
MGVK	0.350	780 070

## COPPER CONNECTOR

## MOUNTING LEVER

For use with support profile

Type	Weight kg	Order-No.
MGVS	1.50	780 090

## INSTALLATION COMB

Set for VKS10

To adjust the air gap at the joint

Type	Weight kg	Order-No.
MK	0.230	781 112

# QUESTIONNAIRE

Company: \_\_\_\_\_

Fax: \_\_\_\_\_

Date: \_\_\_\_\_

Email: \_\_\_\_\_

Phone: \_\_\_\_\_

Internet: \_\_\_\_\_

1. Number of conductor system installations: \_\_\_\_\_

2. Type of equipment to be powered: \_\_\_\_\_

3. Operating voltage: \_\_\_\_ Volt      Frequency: \_\_\_\_ Hz  
Three phase voltage:  AC voltage:  DC voltage: 

4. Track length: \_\_\_\_\_

5. Number of conductors: \_\_\_\_\_ neutral: \_\_\_\_\_ control: \_\_\_\_\_ ground: \_\_\_\_\_

6. Mounted position of conductor system:

- Conductor pendant / collector cable facing to the bottom       Conductor pendant / collector cable lateral payout<sup>(1)</sup>  
 Support distance (m)       Other:

7. Number of consumers per system: \_\_\_\_\_

8. Indoor:       Outdoor: 

9. Special operating conditions (humidity, dust, chemical influences etc.) \_\_\_\_\_

10. Ambient temperature: \_\_\_\_\_ °C min. \_\_\_\_\_ °C max.

11. Hall expansion joints: \_\_\_\_\_ pieces. min. \_\_\_\_\_ max. \_\_\_\_\_ expansion

12. Position and number of feeding points<sup>(1)</sup>: \_\_\_\_\_13. Position and number of isolating sections (e.g. for maintenance<sup>(1)</sup>): \_\_\_\_\_14. How will the conductor system be arranged?<sup>(1)</sup>: \_\_\_\_\_15. Brackets required: yes ; no  c/c distance beam / conductor system \_\_\_\_\_

Flange width of beam: \_\_\_\_\_

16. Travel speed: \_\_\_\_\_ in curves: \_\_\_\_\_ at transfers: \_\_\_\_\_

17. Max. voltage drop from the conductor feed point to the consumer considering starting current:  
3%  other \_\_\_\_\_ % referring to the nominal voltage.

18. Power consumption of the individual consumer loads: \_\_\_\_\_

Motor Data	Crane 1						Crane 2					
	Power kW	Nominal current			Starting current		Type of Motors <sup>(2)</sup>	Power kW	Nominal current			Type of Motors <sup>(2)</sup>
		A	cos ΦN	% DC	A	cos ΦN			A	cos ΦN	% DC	
Hoist motors												
Auxiliary hoist												
Long travel												
Cross travel												

Mark with \* those motors which can run simultaneously

Mark with Δ those motors which can start up simultaneously

Further remarks: \_\_\_\_\_

---

---

---

Signature \_\_\_\_\_

(1) Sketches required for quotation

(2) Use: K for squirrel cage motor, S for slirping motor, F for frequency controlled motor

## SERVICE & SUPPORT

### WE DEVELOP TAILOR-MADE SOLUTIONS FOR YOUR APPLICATIONS

The successful range of VAHLE systems is complemented by a comprehensive range of services tailored to meet our customers' requirements, including

- System design
- Project management
- Commissioning
- Engineering
- Installation & installation supervising
- After-sales service
- Product training courses
- Maintenance packages

We will be glad to apply our expertise to develop specific solutions for your company. Give us a call and arrange for an appointment to learn more about VAHLE systems and services to meet your requirements.

**VAHLE Inc.**

1169 Brittmoore Rd.  
Houston, TX 77043

Tel: 713-465-9796

Fax: 713-465-1851

E-mail: [salesinbox@vahleinc.com](mailto:salesinbox@vahleinc.com)
